SUMMARY

Artificial Intelligence and Data Science graduate with strong problem-solving skills and a solid foundation in Data Structures & Algorithms. Skilled in Python and Machine Learning with hands-on experience through internships and academic projects. Passionate about developing data-driven solutions and seeking an opportunity to grow as a fresher in AI and Data Science.

PROJECTS

Intelligent Blood Donor Locator System (Final Year Project)

- Engineered a location-aware web application to optimize blood donor discovery during emergencies.
- Applied clustering using OPTICS and geospatial distance filtering to identify the most relevant donors.
- Developed a full-stack system with role-based access (admin, hospitals, donors) ensuring secure data handling and efficient workflow.
- Implemented real-time donor request and response mechanisms to reduce response latency.
- Enhanced usability through responsive UI design and automated certificate generation using image processing techniques.

Seoul Bike Rental Prediction (ML Project)

- Performed Exploratory Data Analysis (EDA) and statistical analysis (correlation, distributions, trends) to uncover key patterns in bike rental demand.
- Streamlined data preprocessing using Scikit-learn, including feature selection and scaling, improving model efficiency.
- Built and optimized a Random Forest model, increasing forecasting accuracy and providing actionable operational insights.

Green Tech Innovation: PMFC-Aeroponics System (Team Project)

- Designed an integrated system combining PMFC, solar energy, and IoT automation.
- Engineered a self-sustaining prototype addressing food security and clean energy needs.
- Led the innovation in bio-integrated agriculture and renewable power systems.
- Demonstrated potential for decentralized energy and food production in sustainable environments.

INTERNSHIPS

- **Data Analyst Intern, "Unified Mentor" (Online) – (July 2024 – August 2024)**
Gained experience in data analysis techniques and tools.
- **Data Science Intern, "Main Flow Services & Technologies Pvt. Ltd" (Online) – (July 2025 – August 2025)**
Developed Python-based data pipelines and performed exploratory data analysis on diverse datasets.
- **Data Science & Analytics Intern, "Pydun Technology" (Offline) – (July 2025 – August 2025)**
Hands-on work in data analytics, Power BI, Excel, basic Tableau, and SQL.
- **Full-Stack Web Development with AI Internship, "Pydun Technology" (Offline) - (March 2026 - April 2026)**
Built responsive web applications with AI-powered features to improve functionality and user experience

EDUCATION

Bachelor of Technology in Artificial Intelligence and Data Science.

(2022-2026)

NPR College of Engineering & Technology

- Specialization in Data Science & Machine Learning
- Honours Programme Graduate
- CGPA: 8.6/10 (Graduated)

CERTIFICATIONS & SKILLS

- **Technical Skills:** Python Programming, Machine Learning, DSA, SQL, Excel, Power BI, Tableau, Data Cleaning, Exploratory Data Analysis (EDA), Dashboard Creation, Flask, Django and Canva.
- **Certifications:**
 - Python for Data Science – NPTEL (Elite Silver, 78%)
 - Completed additional certifications from Infosys, Great Learning, Simplilearn, HP Life, and Forage (TATA)
 - [Certificateslink](#).
- **Professional Skills & Engagement:**
 - Coordinated a seminar and actively participated in multiple webinars, workshops, and seminars to enhance technical and professional skills.
 - Developed strong teamwork, communication, and problem-solving abilities through collaborative projects and interactive sessions.
